

America's diner is always open.

May 29, 2013

We were introduced to S&K Oil Sales and Zeco Oil Management Program in mid-2012 and the very first location of the Denny's Mountain Range Group to use the Zeco Oil Management Program.

Filtering our deep fryer oil was very time consuming and had not done on a regular basis. The Zeco oil filtration system allows our staff to safely wash our fryers, double micro filter our oil and transport the expired oil safely when needed. S&K Oil Sales also provided us with a Zeco Oil Rack to hold our expired oil. Because the Zeco system is totally integrated and user friendly, our entire management team is able to schedule our fryers to be cleaned and oil filtered twice a day which has resulted in an oil reduction of nearly 30% a week on average without sacrificing Denny's high food quality standards.

Working with S&K Oil Sales is truly working with a partner. Their great customer service and oil expertise has helped my management team understand and implement a workable Oil management program that is our Total Oil Management solution we have in place today.

We would sincerely recommend S&K Oil Sales for your total oil management solution and the Zeco Oil Management System.

Sincerely,

Robert Dare
General Manager
Denny's 83rd / Bell Road
Phoenix, AZ
