

September 25th 2013

To whom it may concern:

I am the General Manager at the Denny's Restaurant located in Great Falls, Montana and I would like to share our experience with the Zeco Eco filtration machine since partnering with Montana Oil Solutions who represents the product line of Zachary Company's.

Before incorporating the Zeco filtration machine program, we were using a cone filter with a stockpot. Now utilizing the Zeco battery operated system it allows our staff to filter safely, improved the quality of the food tremendously, gave us a way to transport our hot expired oil to our oil dumpster out back without worrying about spillage or any slip and falls on the ice and has reduced our oil consumption by 100% which save us hundreds of dollars each month.

We are extremely satisfied with the performance and the results and would highly recommend the Zeco oil management program for your total oil management solutions.

Sincerely,

A handwritten signature in black ink that reads "Bill Haer". The signature is written in a cursive style with a large, stylized "H".
