Subject: Zeco Pro Series 3- Mobile Battery Operated Oil Filtration & Transport System.

We are the first Outback Steakhouse to purchase the Zeco Pro 3 Series - Mobile Battery Operated Oil Filtration & Transport System.

Purchasing the Zeco Pro 3 now allows our staff to safely wash our fryers, filter our oil, and transport expired oil with one machine. The Zeco Pro 3 is very user friendly and most importantly, extremely safe because of the battery operated, cordless feature.

Additionally, with double onboard filtering, we have also seen our oil consumption reduced by nearly 50%.

Our fried food quality is consistent and our food compensations have also been reduced.

Transporting and pumping our waste oil is the safest it's ever been because of the sealed tank and the battery operated pumping.

We are extremely satisfied with the performance and results and would highly recommend the Zeco Pro Series for your total oil management solution.

Sincerely,

A handwritten signature in black ink that reads "Chris Dippong". The signature is written in a cursive style with a long, sweeping tail on the "g".
