From: Outback Steakhouse Arizona Stores

Subject: Zeco Pro Series 3– Mobile Battery Operated Oil Filtration & Transport System.

We are one of the many Arizona Outback Steakhouse facilities that purchased the Zeco Pro 3 Series – Mobile Battery Operated Oil Filtration & Transport System.

Purchasing the Zeco Pro 3 now allows our staff to safely wash our fryers, filter our oil, and transport expired oil with one machine. The Zeco Pro 3 is very user friendly and most importantly, extremely safe because of the battery operated, cordless feature.

Filtering twice a day with Zeco cordless operation along with double onboard filtering significantly improves our cooking oil life, and continuously provides the consistent quality fried food that our customers expect, demand, and most importantly deserve.

Transporting and pumping our waste oil is the safest it's ever been because of the sealed tank and the battery operated pumping.

Lastly, the Zeco has a LIFETIME WARRANTY. Our cost of ownership since day one has been and continues to be ZERO. No Service Call Costs... No Parts Cost... No Training Costs... No Costs.

The support and service that the Zeco staff provides is outstanding and we are extremely satisfied. We would highly recommend the Zeco Pro Series for your total oil management solution.

Sincerely,
